ALL-ROUND MOBILE HOME

**MAYA**

IDEA **MOBILE** HOME

In the wind,  
sun, rain  
and snow.

### All-round mobile home Maya

#### MODULARITY

With a little help from innovative technology, our mobile homes are created out of two, three or more separate modules. Modular system of production provides easier transportation, lower cost and greater mobility.

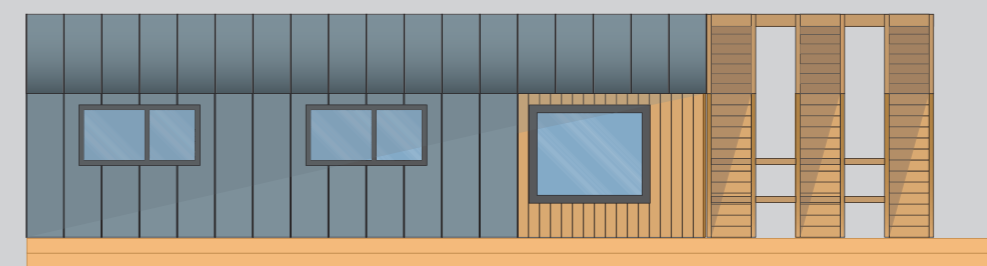

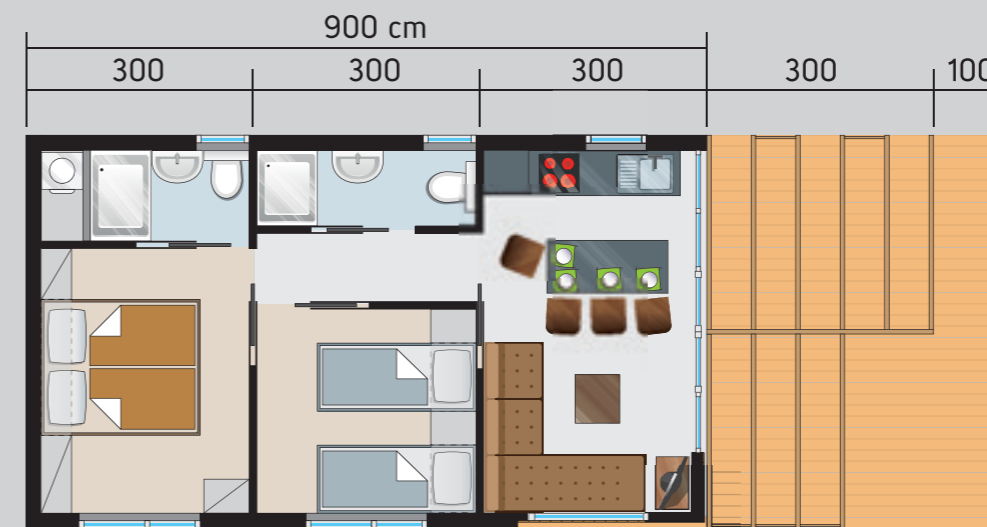

#### MOBILITY

Modules are placed on wheels, width 300/520 cm length and are transported by truck. They are towed at the place of assembly by a tow vehicle. At the location they are assembled into one unit without the use of heavy machinery. Thanks to modality, the mobile home and the terrace easily adapt to the location, with maximum preservation of the natural environment.

#### ENERGY EFFICIENCY

The walls of 22 cm thick SIP system with 20 cm insulation, guarantee good thermal protection in all weather conditions. Falcon steel sheet cover further protects the house from wind and precipitation. Low thermal conductivity is ensured by triple iso glass with Sunglass protection.

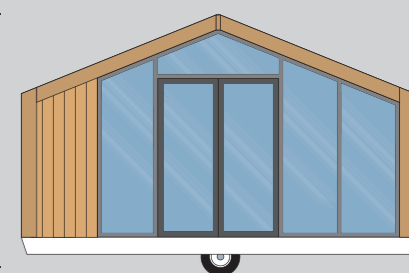

- More heating and cooling options- electric, gas, heat pumps, solid fuels...
- Underfloor heating systems

#### TECHNICAL DATA

520

105  
190  
335  
40

House dimension: 900×520 cm, 47 m<sup>2</sup>  
Inner ceiling height: 170/255 cm  
Capacity: 4+2 persons

Partially covered terrace dim.: 520×400 cm, 21 m<sup>2</sup>

Wooden floor- larch  
Protective wooden fence

Gable roof with a colored trapezoidal steel tin

Wall: Structural insulated panel (SIP), 22 cm intersection, 20 cm Insulation, styrofoam

Ceiling: structural insulated panel (SIP), 22 cm intersection, 20 cm insulation, styrofoam

High quality PVC and wood joinery, with double insulated glass

Facade: Folded colored steel sheet and wooden decking

Metallic chassis
